

FROM EARTH TO PEOPLE

SHALLOW GEOTHERMAL ENERGY FOR ALL.
ENCOURAGING BUSINESS AND GREEN BUILDINGS IN THE ADRIATIC.
INTERNATIONAL CAPACITY BUILDING SEMINAR AND PRESENTATION OF THE RESULTS OF THE LEGEND PROJECT.

Event promoted by the Province of Ferrara and the Emilia-Romagna Region with the support
of the Green Building Council and the European Geothermal Energy Council.

Friday 12th December 2014
Castello Estense - Ferrara [Italy]

Ground Coupled Heat Pumps (GCHP) technologies can be an option not only for the new high-energy-class buildings but also for dated and low-energy-performance residential and industrial buildings, marking the transition from the actual “niche” position to the large market uptake. In this sense, the Adriatic Regions and the Balkan Countries have a huge geothermal energy potential and offer great opportunities to investors and companies to make business. What is the real stage of the market? What are the best technological solutions? Is it possible to create transnational supply chains among designers, geologists and specialists? **LEGEND project**, the largest GCHP programme ever financed by the EU in Adriatic, helps you to learn about the geothermal energy transition in the Adriatic and the Balkans.
